

Heuristic Evaluation of HealthEat			
Evaluated by: T01 Group 1			
Heuristic	Description	Suggestion for Fix	Severity
Help and documentation	When inserting a new recipe, there are no form labels.	Add proper labels to each input box	4
Consistency & Standards	The Calendar page fills up with information under "Friday" even when I choose "cancel" on the "generate recipe" page.	Do not add info to the friday column if cancel is chosen	3
Consistency & Standards	The "Back" option on the "Add family members" page returns to the main page instead of the previous page.	Fix the back button	3
User Control and Freedom	In meal planning the user is limited to 3 meals a day.		
		Consider allowing for more flexible scheduling	3
Recognition Rather Than Recall	The spoon and stars symbols are ambiguous and not immediately clear.	Consider implementing a mini-onboarding process in form of pop-up	3
Recognition Rather Than Recall	When on the recipe page, the bottom right button represented with a fridge symbol brings you to a page unrelated to the symbol.	Change the symbol to a more appropriate one that relates to linked page	3
Consistency & Standards	The "Replace" option on the "High Protein Omelet" returns to the main page and does not replace anything.	Swap the "Replace" for "Return" or "Home"	2
Consistency & Standards	The "Back" option does not work on the "High Protein Omelet" page.	Fix the back button	2
Visibility of System Status	On the page where you can add cards, the user can continuous add more cards but the screen becomes filled and overlayed.	Limit the number of cards or scrolling	2
Visibility of System Status	Uncertain what the "Quick Swap" is swapping between.	Add a guide to show what the function is	2
Aesthetic and Minimalist design	When "Quick Swapping" the layouts of the surrounding icons are not consistent.	Fix the layout	2
Aesthetic and Minimalist design	On the calendar page the information displayed on the weekly view is too small to read.	Possibly add an overlay when a day is clicked to display more clearly	2
Visibility of System Status	Uppermost menu on homescreen does not have a proper label.	Add proper labels	2
Match between System and Real World	When creating a new profile or account, you can submit without filling out any information.	Do not allow submit until required data is there	1
Flexibility and Efficiency of use			
	The expiry notifications say "soon" which is a bit vague.	Consider listing the remaining shelf life	1
Severity Legend			
Severity	Description		
0	Not a usability problem		
1	Usually just a cosmetic problem		
2	Minor usability problem		
3	Major usability problem		
4	Experience breaking problem		
Used Heuristics			
In conducting the heuristic evaluation on HealthEat, our team used the 10 criteria from Jakob Nielson.
