Important Problems

Severity	Heuristic	Description	Suggestions
4	Help and documentation	When inserting a new recipe, there are no form labels	Add proper labels to each input box
3	Consistency & Standards	The Calendar page fills up with information under "Friday" even when I choose "cancel" on the "generate recipe" page	Do not add info to the friday column if cancel is chosen
3	Consistency & Standards	The "Back" option on the "Add family members" page returns to the main page instead of the previous page	Fix the back button
3	Recognition Rather Than Recall	When on the recipe page, the bottom right button represented with a fridge symbol brings you to a page unrelated to the symbol	Change the symbol to a more appropriate one that relates to linked page
3	Recognition Rather Than Recall	The spoon and stars symbols are ambiguous and not immediately clear	Consider implementing a mini-onboarding process in form of pop-up
2	Visibility of System Status	Uppermost menu on homescreen does not have a proper label	Add proper labels
2	Visibility of System Status	On the page where you can add cards, the user can continuous add more cards but the screen becomes filled and overlayed	Limit the number of cards or scrolling
2	Visibility of System Status	Not certain what the "Quick Swap" is swapping between	Add a guide to show what the function is
2	Aesthetic and Minimalist design	When "Quick Swapping" the layouts of the surrounding icons are not consistent	Fix the layout
2	Consistency & Standards	The "Back" option does not work on the "High Protein Omelet" page	Fix the back button
2	Consistency & Standards	The "Replace" option on the "High Protein Omelet" returns to the main page and does not replace anything	Swap the "Replace" for "Return" or "Home"
2	Aesthetic and Minimalist design	On the calendar page the information displayed on the weekly view is too small to read	Possibly add an overlay when a day is clicked to display more clearly

Severity	Heuristic	Description	Suggestions
2	Match between System and Real World	When creating a new profile or account, you can submit without filling out any information	Do not allow submit until required data is there
1	Flexibility and Efficiency of use	The expiry notifications say "soon" which is a bit vague	Consider listing the remaining shelf life
2	Aesthetic and Minimalist design	On the calendar page the information displayed on the weekly view is too small to read	Possibly add an overlay when a day is clicked to display more clearly
2	Match between System and Real World	When creating a new profile or account, you can submit without filling out any information	Do not allow submit until required data is there
1	Flexibility and Efficiency of use	The expiry notifications say "soon" which is a bit vague	Consider listing the remaining shelf life
2	Aesthetic and Minimalist design	On the calendar page the information displayed on the weekly view is too small to read	Possibly add an overlay when a day is clicked to display more clearly

Less Important Problems

Severity	Heuristic	Description	Suggestions
3	User Control and Freedom	In meal planning the user is limited to 3 meals a day.	Consider allowing for more flexible scheduling

Suggestions for Future Projects

Severity	Heuristic	Description	Suggestions
1	Aesthetic and Minimalist design	The blue used looks like grey which doesn't look good, gives it an old look	Make the colour more blue or use different colour scheme
1	Aesthetic and Minimalist design	Some blue boxes could look better with some transparency	Play around with different levels of Transparency to give the app some depth
